

# HACKED!

## PROTECT YOUR BUSINESS WITH CYBER INSURANCE

**As digital technology advances, so do cyber risks, which are now all too commonplace and can include the following:**

- Hacking & malicious attacks – e.g. Ransomware, which can lock all of your data until a ransom is paid, with no guarantee of it being unlocked
- Email scams – e.g. a hacker (posing as a Director) authorising staff to make payments
- Stolen/lost data and laptops
- System failure
- Employee negligence
- Other yet unknown sophisticated attacks and scams still to come

**In the event of financial loss or reputational damage to your business, Cyber insurance provides a financial safety net and expert crisis management/PR services for your business and its clients.**
